PROFESSIONAL SUMMARY

Computer Engineering graduate (June 2026) who turns ideas into working, tested products and enjoys the full path from design to validation. Brings cross-domain range from three internships, a team-led senior project as AI Lead, and an independently shipped mobile app, paired with a Business Administration secondary field that adds a product and stakeholder perspective.

EXPERIENCE

Software Developer Intern, Arch of Sigma

March 2026 – April 2026

- Engineered a modular Python command-line (CLI) application with full CRUD (create, read, update, delete) operations and file-based persistence.
- Hardened the application with input validation and structured exception handling for robust error management.
- Modeled and visualized data in Excel using PivotTables, VLOOKUP, and IF/COUNT formulas to surface actionable insights.

Information Technology Intern, ATM Bilişim

July 2025 – August 2025

- Operated and monitored Microsoft Azure cloud resources, handling provisioning, resource management, and usage monitoring.
- Administered Microsoft 365 (Office 365), configuring user management, security settings, and access controls.
- Evaluated Microsoft Copilot integration across Office applications to improve workflow efficiency.

Cybersecurity Intern, TürkTraktör A.Ş.

July 2024 – August 2024

- Performed security log analysis, detection-rule creation, and event monitoring in IBM QRadar (SIEM), strengthening threat-detection workflows.
- Applied the MITRE ATT&CK framework to map adversarial tactics and techniques, and delivered threat-briefing presentations.
- Researched Large Language Model (LLM) architectures and Copilot AI for IT automation and security tooling.

EDUCATION

Bachelor of Science, Computer Engineering (100% English)

July 2023 – June 2026

TED University, Ankara, Turkey

Secondary Field, Business Administration (100% English)

Sep 2024 – June 2026

TED University, Ankara, Turkey

PROJECTS

ILTER-AKKE | Smart Command & Control Glove — Team senior project (4-person team): ESP32 wearable glove with on-device TinyML gesture recognition and ESP-NOW wireless. As AI Lead, built and trained the gesture-classification model and validated it against an accuracy threshold.

FakeIoT Honeypot — Team project: ESP32-based Internet of Things (IoT) honeypot with a Flask pipeline. Personally led the security testing and validation with Kali Linux tools (Nmap, Hydra, Wireshark).

CampusQuest Academy — Solo-built native iOS educational word game (Swift, SwiftUI, SwiftData, SpriteKit) with on-device storage and 5-language localization.

TECHNICAL SKILLS

Programming & Databases: Python, C, C++, Java, Swift, SQL (MySQL)

Cybersecurity: Penetration Testing, Ethical Hacking, IBM QRadar (Security Information and Event Management, SIEM), MITRE ATT&CK, Vulnerability Assessment, Kali Linux, Nmap, Hydra, Wireshark

Cloud & Platforms: Microsoft Azure, Microsoft 365 (Office 365), Microsoft Entra ID, Microsoft Copilot

Embedded & IoT: ESP32, Embedded C, TinyML (Edge Impulse, TensorFlow Lite), Sensor Integration, ESP-NOW

Mobile & Software: Swift, SwiftUI, SwiftData, SpriteKit, Flask, Git

Systems & Networks: Linux, Operating Systems, TCP/IP, Computer Networks

Languages: Turkish (Native), English B2 (iTEP)

CERTIFICATIONS & TRAINING

- Huawei & CloudMetrik Cybersecurity Bootcamp — 2026
- Linux Operating Systems in Cybersecurity; Database Attacks and Database Security — ICTA, 2025
- Advanced Java & C Programming Language — ICTA, 2025
- Introduction to Microsoft Azure Cloud Services — Microsoft, 2025
- Software Engineering Specialization (UML; Implementation & Testing; Design & Project Management) — HKUST, 2025

ACTIVITIES

- Vice Chairman of the Board of Directors — TEDU Science & Technology Society (2 years)
- Table Tennis Competitor (12 years)
